

***A Superhighway for the Delivery and Tracking
of information, documents, and eLearning***

MyHYPERTracksm provides a web solution that allows your internal and external information and training to flow freely yet provides a management tool that puts you in control.

Developed and refined over the last 10 years, the product delivers and keeps track of any kind of information including online and classroom training, written documents, video, sound, CAD, and others.

The interface is simple to learn and use, and the task-based design makes management quick and easy. It is a truly global information and learning platform for one employee or thousands.

Solutions

MyHYPERTracksm is an online communication superhighway for your company or organization.

Automatically deliver and track any type of training or *communication media** along with all viewer's activity related to that media.

Assign via Email - Assign training and media to viewers via an email with embedded links to the training or media.

Instantly Create Activity Reports – Access saved activity records 24 hours a day and build reports by viewer or communication media.

Process "New Hire" Paperwork – send a single email to the new hire with all of the documents they need to review or fill out. The new hire reviews and completes the documents and submits online eliminating paper handling. Fast and Easy!

Monthly Subscription, Cancel Anytime! Only \$2.00/user/month or less depending on total number of users.

Purchase ready-to-use online courses – Easily add single-use courses any time on a wide variety of topics. Great for meeting OSHA, EPA, DOT compliance standards.

*** Online Communication media can be any of the following:**

- Interactive training (SCORM 1.2 by Vendors or your own PowerPoint, etc.)
- Live Classroom and Webinars
- Track who has attended Conferences (GoToMeeting, Live Meeting)
- Tests that are auto-scored (create yourself in MyHYPERTracksm)
- Surveys that are auto-tabulated (create yourself in MyHYPERTracksm)
- Text and written documents like Word, Excel, .PDF
- Video. Animation and Sound clips
- Photos, Maps and CAD Drawings
- Most any media that can be displayed on a computer screen
